WIRELESS KEYPAD   INTELLICODE® 1 MODE

To Operate Intellicode® 1 Openers:

This Wireless Keypad comes from the factory as an Intellicode® 2 unit. In order to initially program an opener or openers which are Intellicode®1, you must switch the Keypad to Intellicode®1 mode.

- After entering your PIN, Press [▼▲].
- Press and hold [PROGRAM] for two seconds and the GREEN LED above the number keys will turn RED.
- Close the Keypad cover.
- Follow the instructions on this page for programming your Intellicode® 1 opener(s).

Once all your doors have been programmed, there is no need to switch back and forth between Intellicode® modes. The Keypad will automatically remember the mode of each opener.

SECTION 1 — BASIC PROGRAMMING FOR ONE DOOR INTELLICODE® OPENER

FOR CONVENIENCE

Program Keypad _BEFORE_ mounting.

STEP 1: CREATING YOUR WIRELESS KEYPAD PIN (PERSONAL IDENTIFICATION NUMBER)

- Press in order [3] [5] [7] .
- Press [PROGRAM] .
- Enter your PIN (3 to 8 characters).
- Press [PROGRAM] .
- Close keypad cover and wait 30 seconds.

STEP 2: TEACHING PIN TO SINGLE OPENER

Find the Learn Code Button and Learn Code Indicator LED on your door opener.

- If your Door Opener has a black antenna wire *and* the serial number does not start with 10 or higher, the Learn Code Button and Indicator LED are located near the antenna. (The light lens may need to be opened. If you use an external receiver, it may need to be opened to access the Learn Code Button and Indicator LED.

Red Indicator LED

Located on Opener Housing

Learn Code Button

- If your Door Opener *does not* have an Antenna, you have an External Receiver. The External Receiver cover must be removed to access the Learn Code Button and Indicator LED.

- Press the Learn Code Button.
  - Learn Code Indicator LED (on Opener) will blink.
- Enter your PIN and press [▼▲] on Keypad.
  - Learn Code Indicator LED stays on.
- Press [▼▲] again.
  - Learn Code Indicator LED turns off.
- Press [▼▲] again.
  - Opener will run.

Wait until Keypad Backlight turns off (approximately 30 seconds).

STEP 3: OPERATING ONE DOOR OPENER

To open or close the Garage Door.
- Enter your PIN.
- Press [▼▲] .

NOTE

- If the Door does not move, check the red LED on Keypad. If the LED is blinking rapidly, the PIN was entered incorrectly. After the LED stops blinking, re-enter your PIN and try again.
- Any Keypad Button will control the Door for 30 seconds after the Door starts moving.
- Rapid blinking of the red LED indicates an error. After a few seconds the LED will turn off. Start over.

Proceed to Section 3 - Mounting Instructions.
